

Alex Ayso

SENIOR SOFTWAREENGINEER • FULL
STACK MOBILEDEVELOPER • FLUTTER
DEVELOPER

Executive Summary

Hi, I'm Alex — a senior software engineer based in the Philippines with 7+ years of experience specializing in mobile development. I build high-quality mobile and web apps — Flutter is my primary framework. Also with hands-on experience with backend dev, DevOps, Firebase, and Google Cloud. I've set up CI/CD pipelines, integrated Firebase from scratch, and led mobile teams through full product cycles.

I've shipped production apps across iOS, Android, and web, working with startups and established companies from the Philippines, US, Sweden, and the UK.

I care about clean architecture, real-world performance, and products users actually enjoy using.

Areas of Expertise

- Flutter development
- Android Studio (Java and Kotlin)
- Xcode
- Backend development (NodeJS)
- Google cloud functions
- REST API integrations
- Firebase setup and integrations

Work Experience

FULL STACK FLUTTER DEVELOPER

Utah Tech Labs - Utah (WFH)

Oct 2025 - Present

At Utah Tech Labs, I was assigned a to developed and maintained cross-platform mobile applications by translating Figma design mockups into responsive, user-friendly interfaces. Built clean, efficient, and scalable code using Flutter and Swift, integrated complex backend APIs with robust error handling, and leveraged AI-powered solutions to enhance app functionality and user experience. Performed thorough testing, debugging, and performance optimization to ensure smooth interactions, while providing clear technical documentation and ongoing application support

FULL STACK FLUTTER DEVELOPER

Nostalgitrippen AB - Sweden (WFH)

June 2024 - August 2025

At Nostalgitrippen AB, I led the development of Nostalgia Words, a nostalgic word trivia mobile game, where I played a key role in building new features such as interactive transitions, background music, sound effects, and animations. I integrated Firebase for backend services, including Firestore, messaging, and cloud functionalities, as well as AWS for additional cloud support. I also implemented CI/CD pipelines for streamlined deployments and leveraged Firebase's machine learning for in-app analytics. My work involved technologies like Flutter, Firebase, AWS, and GitHub Actions, delivering a seamless experience on both Android and iOS platforms.

FULL STACK FLUTTER DEVELOPER (Freelance)

Multiple Companies - UK, Utah (WFH)

Feb 2023 - June 2024

Lead the technical implementation of company's projects. Created POC for target clients. Involved in the entire development initiative. From technology selections and implementation. Exposed in technologies such as AWS Cloud integrations, Flutter, Firebase, NodeJs, React, CI/CD pipelines.

- AWS Cloud
- SQL and NoSQL database
- CI/CD
- Unit tests
- Playstore and Appstore distributions

Education

Arellano University

June 2013 - April 2017

Bachelor Of Science In Information Technology
